

# LETTER OF MOTIVATION

## FOR DATA ENGINEER POSITION

75013

ELISETNP@GMAIL.COM

**Dear Hiring Manager & Talent Recruiter,**

I am writing with great enthusiasm to apply for the Data Engineering position at your company. With over 3 years of experience in similar roles and more than 5 years in innovative tech companies, I am thrilled to embark on my next adventure.

Highlights of my qualifications include:

- **Data Engineering Expertise:** Extensive experience in data ingestion, transformation, and orchestration with Airflow, ensuring efficient and cost-effective data workflows.
- **Data Warehousing and Optimization:** Proficient in managing and optimizing PostgreSQL databases.
- **Data Product Deployment:** Skilled in deploying data products using Python, Docker, Kubernetes, and Gitlab CI/CD, coupled with comprehensive documentation capabilities.

In addition to my technical skills, I'm a dedicated team player with a keen interest in motivating my colleagues. I am always looking for ways to improve the mood around me, thereby contributing to a positive and collaborative working environment. My belief in the power of teamwork and a positive atmosphere drives me to not only advance my own skills but also support the growth and well-being of my peers. Other than that, I have extensive experience working directly with a CEO, assisting in business pitches, so effective communication is second nature to me. Additionally, starting from small jobs at the age of 16 (influenced by reading "Rich Dad Poor Dad" at such a young age...) has solidified my reputation as a hard worker.

I am genuinely excited about the prospect of joining your esteemed company and contributing to its success. One of my key aspirations is to leverage my expertise to transition data from pipelines to actionable insights. I firmly believe that the ultimate goal of data engineering is not merely to manage pipelines, but to transform raw data into valuable insights that drive business decisions. Throughout my career, I have honed my communication skills to effectively convey complex technical concepts to stakeholders, ensuring a seamless translation of business requirements into technical solutions. I am eager to collaborate with like-minded colleagues who share a passion for continuous learning and innovation. Together, I am confident that we can stay at the forefront of the latest tech trends and propel the company to new heights of success.

Thank you for considering my application. I am eager to delve deeper into my qualifications and discuss how I can contribute to your team during a forthcoming discussion.

Best regards,

**TRAN**
